

# Planning for the STEM Shift *with* Jill Berkowicz and Ann Myers

---

Join us for a powerful one-day session with the authors of ***The STEM Shift: A Guide for School Leaders*** as we bring district, building, and teacher leaders together to explore the possibilities of a path toward a STEM shift in your district.

**STEM has an undeniable presence on the educational landscape. STEM-identified classes, programs, and events are appearing everywhere. States have funded initiatives to develop a generation of STEM teachers. An extraordinary coalition among business leaders, government leaders, philanthropists, parents, and communities at large is generating a crescendo of support for STEM schools.**

**STEM seedlings emerged in charter schools, in magnet schools, or as specialized high schools. Supported by government and private dollars they began to attract attention. Forward-thinking school leaders and their teams traveled to visit them and considered how to replicate them. STEM programs are being created daily across the nation, but few districts are exploring the full depth and breadth of possibility, the radical opening that STEM presents (Myers & Berkowicz 2015).**

Districts are encouraged to register in teams of 3-5, with a focus on making the STEM Shift in Middle and High Schools.

### ***Event Details:***

*Tuesday, August 23, 2016*

*Holiday Valley Resort, Ellicottville*

*Registration will begin at 8:00 a.m.*

*The workshop will run 8:30 a.m. – 2:30 p.m.*

*Lunch will be provided.*

*No cost for CA BOCES Districts and stipend reimbursement is available. Space is limited; register soon!*

To register, please have your Curriculum Coordinator or Contact Person contact: Laurie Sledge: [laurie\\_sledge@caboces.org](mailto:laurie_sledge@caboces.org) or 716.376.8357
