# NYSED Numeracy Initiative Hybrid Webinar

## FEATURING A PRESENTATION FROM DR. DEBORAH LOEWENBERG BALL

**Date**: October 27, 2026
**Time**: 9:00 AM – 12:00 PM
**Location**: Designated BOCES, Big 5, or Small City School District site

This statewide hybrid webinar will provide New York State administrators, mathematics leaders, and educators with an opportunity to deepen their understanding of evidence-based mathematics practices and the resources available to support implementation. Participants will learn about the legislative requirement for districts to attest to the use of evidence-based mathematics practices, review key resources developed through the Numeracy Initiative, and explore strategies for strengthening mathematics instruction. Please note that participation in this event requires attendance at a designated BOCES, Big 5, or small city school district host site.

During the event, the New York State Education Department will release the **K-5 Mathematics Best Practices Guide**, share additional implementation supports aligned to the previously released Numeracy Briefs, and highlight how these resources can support instructional improvement, professional learning, and local implementation efforts.

Participants will engage in facilitated reflection and discussion with colleagues and hear from **Dr. Deborah Loewenberg Ball**, the Jessie Jean Storey-Fry Distinguished University Professor of Education at the University of Michigan and the Director of TeachingWorks, alongside members of the NYSED team.
