

-Making the Most of Makerspaces-

Fostering an environment of innovation and creativity

Helping students to be innovative, creative thinkers is at the core of all good instruction, and one way to encourage such good thinking is through the use of Makerspaces. In said spaces, students can gather to create, invent, and learn.

Join us as we explore the practice and purpose behind a Makerspace and share ideas as to how to build a Makerspace of your very own.

This training will address NYS Teaching Standards III for Instruction and IV for Learning Environment
