

*People who integrate technology and keep all the systems running in schools have an important role in education. These quarterly meetings during the school year are important to give tech people time to collaborate and discuss effective tech integration, software, hardware and mobile device management and have time to see teachers and students using the technology that so many keep up and running.*

**CoSer 518**

**Dates:**

*October 7, 2015  
December 3, 2015
