

Curiosity and Questioning in the Classroom

Date: 08/14/2019

Site: CA BOCES Barn, Training Room

Time: 08:30 AM – 02:30 PM

COSER
529

Description:

This workshop will help educators focus on student-centered learning through inquiry-based learning practices. Curiosity and questioning are inherent within us all, yet as children grow older, they may become more reserved in exploring their curiosity. The workshop will help kids develop autonomy, exploration and experimentation skills, bolster their imagination, and embrace intrinsic motivation. In addition, the workshop will offer ways teachers can get their students to ask questions through the Question Formulation Technique and also using Essential Questions to guide their lessons and units.

Facilitator(s):

Brendan Keiser

Objectives:

- Learn how to develop autonomy, exploration, experimentation, imagination, and intrinsic motivation within students through curiosity
- Experience the Question Formulation Technique
- Develop essential questions for their units
- Understand the why-what if-how protocol for problem solving

Audience:

Administrators, Instructional Coaches, All Teachers: P-12
