

MakerEd Across the Curriculum

Date: 11/19/2019, 2/27/2020
Site: CA BOCES - Southern Tier West
Time: 08:30 AM – 02:30 PM

COSER
517

Description:

As MakerSpaces become more prevalent across schools today, the push is now on sustaining the MakerEd platform by connecting it to other content areas and curricular focuses. By looking beyond just the technology and MakerSpace classrooms, we can find activities throughout the curriculum that can be brought to new life through the use of Maker activities like 3D printing, app creation, coding, and more! Bring a lesson or unit plan and let us help guide you to find new ways to make the lesson more interactive, shift the focus to creating something that exemplifies the students' learning through the content area and show off skills and thoughts in new and exciting ways!

Facilitator(s):

Ryan McGinnis, Robert Miller

Objectives:

- Learn how to enhance current student learning artifacts with new technologies
- Learn how to create with Makey Makey's, Hummingbird electronics or other circuitry/coding aspects
- How to 3d design
- How to implement Green Screen
- How to assess the Dioramas

Audience:

Teachers: Grades P-12, Administrators

To register, please have your district's registration representative enroll you at this URL: <https://register.caboces.org/seminar/view/3033>
