

LEARNING WITH AUGMENTED AND VIRTUAL REALITY

JULY 13, 2017 *OR* OCTOBER 25, 2017

Extend your physical classroom using VR/AR

Imagine never having seen Niagara Falls, Ocean Waves or Washington DC in person. With today's technology, students can experience this right in the comfort of their own classroom using free web tools and technology that may already be available in your school. Teachers can explore free immersive experiences using virtual reality and take students on virtual tours using augmented reality. Teachers and students can both use free tools to create augmented reality layers that provide new experiences in the classroom. In this workshop, participants will take a deep dive into Virtual/Augmented Reality (AR/VR) devices and develop a deeper understanding of how both educators and students can create meaning about the world around them through AR/VR.

-This is a CoSer 517 Learning Opportunity-

EQUAL OPPORTUNITY NOTICE

CA BOCES hereby advises students, parents, employees and the general public that it offers employment, programs and educational opportunities, including career and technical education opportunities, without regard to gender, race, color, national origin, handicap or any other legally protected status.
